Resources

How to search for drivers, manuals and spec information on ICP DAS website.

- For Mobile Web

- For Desktop Web

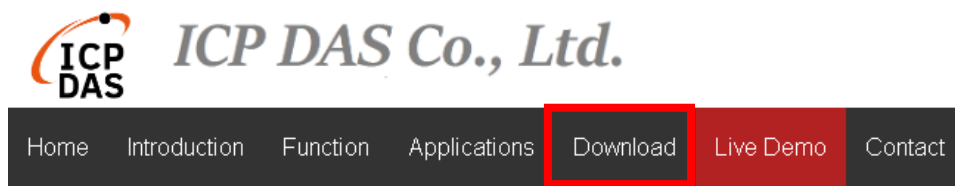

1 Make sure the IoTstar 2025 has been installed

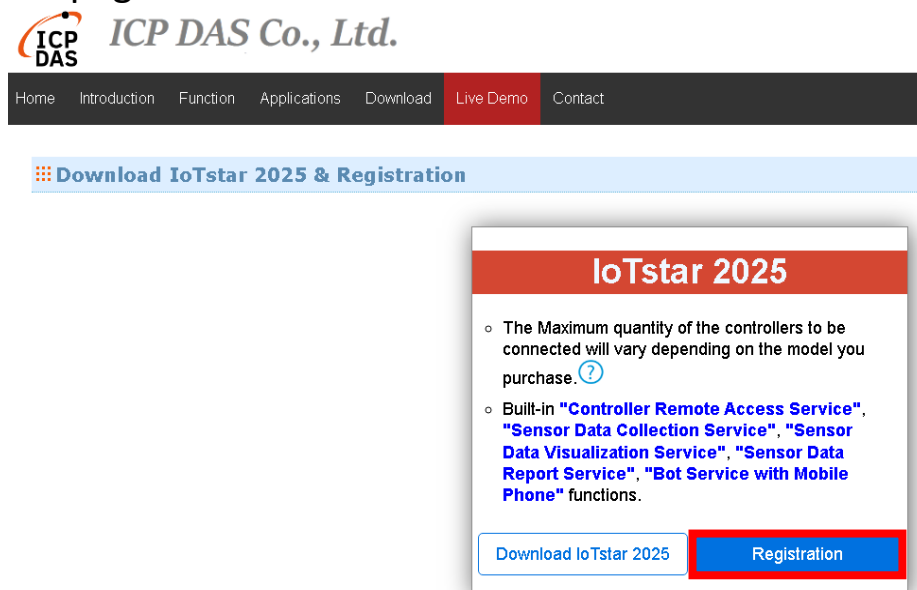

If the IoTstar 2025 has not been installed, please refer to the "IoTstar 2025 Quick Start" document to complete the installation of the IoTstar 2025.

2 Register & get the License file(with the optional package) from IoTstar website

1. Go to IoTstar official website → **【Download】** page.

2. On the "Download" page, click the "Registration" button to enter the Registration page of IoTstar 2025.

3. When the browser enters the Registration page of IoTstar 2025, first click on the "Serial Number Upgrade" button at the top right, and then enter the following information: "E-mail", "Serial Number", "Upgrade Code" and "Hardware ID". Click the "Getting License File for IoTstar" button to save these settings. If the key-in registration information is correct, an email with the new license file of IoTstar 2025 would be sent to the email address you entered.

3 Complete the registration of IoTstar 2025

Follow the steps as below:

1. Click **【Start Menu】** → **【All apps】** → **【ICPDAS】** → **【IoTstar】** to open the IoTstar system interface. Click the "License" button on the IoTstar system interface to open the License setting window.

2. In the "License" setting window, click the "Browse..." button to find the location of the IoTstar (with the optional package) license file.

3. In the "License" setting window, it will display the Information as "Registration status", "Maximum number of controllers can be connected

with IoTstar".
